The Island's area is 113,729 square kilometres, making it the world's 14th-largest island. It has a population of around 3.92 million (June 2022 estimate). This is approximately 77% of New Zealand's population.

Home to about three-quarters of New Zealand's population, it has the country's largest city, Auckland. Surrounded by bays and islands, it is known as the "the City of Sails."
